Remakeable Cap

Use an exacto knife to cut an old cork to fit your Earthbottle

The EarthBottle is 100% locally made from upcycled materials. The design is open source, the bottle indefinitely reusable and the drinking smooth, safe and sexy. Best of all, no factories, no long-transport, no plastic, and no corporations were involved in its crafting... just love!

Every day millions of plastic caps end up in the biosphere. Every day thousands of corks are thrown away. So, we put one and one together, an upcycled cork onto your EarthBottle. Once your cork cap comes to its end, it is safe to biodegrade. And its easy for you to make a new one from any wine bottle cork.
