

# LotusCradle

Beautiful Water

The LotusCradle is a celebration of the beauty and wonder of pure drinking water. Fully made and designed in Bali, it is a simple, organic solution for dispensing water. The 99% plastic-free system is designed around the safe, certified and replaceable Nazawa ceramic water filter. Simply add your local water to the top jug, then watch, drop by drop, as the filtered water fills up the glass cradle below. We use a 100% organic terra cotta firing technique to create the top pottery container, while each cradle each is hand-blown from recycled Bali glass. An embedded light creates a mystical watery ambience. It's water, made beautiful.

Made from organic materials and local traditions in Bali. The easily replaceable Nazawa filter can be ordered online at [Nazawa.com](http://Nazawa.com), or picked up at Bali Bhuda and Kopernik locations.

Our oval design enables a vortex of water circulation to energize the stored water.

Our form factor is based on the design wisdom of ancient water storage traditions
